

FALL 2026
CS 243 - 751

COMPUTER NETWORKS

II

BASIC INFORMATION

<u>Professor:</u>	<i>Tony Sena</i> M.S. Earth Science (Applied Computer Science) M.S./B.S. Computer Science
<u>PIAZZA:</u>	https://piazza.com/massbay/fall2026/cs243/home
<u>E-MAIL:</u>	gsena@massbay.edu
<u>URL:</u>	https://www.massbay.edu/profile/giuseppesena
<u>Online Office Hours:</u>	MON (5 pm-7 pm), THR (11 am-12 pm)
<u>WebEx Address:</u>	https://massbay.webex.com/meet/gsena
<u>Course Name:</u>	<i>Computer Networks II</i>
<u>Course Number:</u>	<i>CS 243 – 751 (Hybrid)</i>
<u>Location:</u>	<i>Wellesley Campus</i>
<u>Room #:</u>	<i>W424</i>
<u>Time:</u>	<i>10:00 AM – 11:50 AM [CS 243-751]</i>
<u>Days:</u>	<i>Wednesdays (Lab)</i>
<u>Dates:</u>	<i>09/08/2026 - 12/23/2026</i>
<u>Prerequisite:</u>	Grade of C or better in CS 242

GENERAL COURSE DESCRIPTION

Switching, Routing, and Wireless Essentials advances your knowledge of the operation of routers and switches in small networks. SRWE will introduce you to wireless local area networks (WLANs) and network security concepts. Students completing this course will be **prepared to take industry-standard networking and/or routing certificate examinations.**

Lecture: **online**
Lab: **2 hours per week. 4 credits**

Course Management System, Textbook, Online Communication, and Software

COURSE MANAGEMENT SYSTEM:

Most courses at MassBay use **Blackboard (BB)** as their course management system. However, **CS 243 (Computer Networks II)** is part of MassBay's **CISCO Networking Academy (CISCO NetAcad)** and does not use BB. Since late 2024, **CISCO NetAcad** has operated on a unified teaching and learning platform hosted at **NetAcad.com**, which combines the content and features previously available on both **NetAcad.com** and **SkillsForAll.com**. On Blackboard, you will find the syllabus, basic course information, and links directing you to **CISCO NetAcad**. All grades, labs, quizzes, chapter exams, midterm and final exams, as well as due dates, are managed exclusively through **CISCO NetAcad**.

TEXTBOOK:

THERE IS NO NEED to buy the Textbook for this class unless you want a hardcover copy. You have free access through the **Cisco Networking Academy** site: <https://www.netacad.com>

[“Switching, Routing, and Wireless Essentials Companion Guide \(CCNAv7\),”](#)

Cisco Networking Academy

ONLINE COMMUNICATION: PIAZZA

We are using **Piazza** (<https://piazza.com/>) for **class discussion**. The system is highly catered to getting you help fast and efficiently from classmates and instructors. Rather than emailing the teaching staff, you should post your questions on Piazza. You can find our class page at:

<https://piazza.com/massbay/fall2026/cs243/home>

NOTE: *You must use PIAZZA for any class discussion (ask questions or contact the instructor). No more emails will be accepted or read after Week 1.*

CLASS PARTICIPATION / ATTENDANCE:

CS 243 is a **hybrid** course, and I will offer guidance for **hands-on labs** and **cover important topics from the chapter(s) in-person** every **Wednesday from 10-11:50 am (CS 243-751)**. **Students must attend this meeting**. This will help ensure that every student in the class is on track and has a chance to connect with me in this environment. During this weekly meeting, we will discuss the work to be done for the current week, labs, NETLABs, quizzes, chapter exams, etc. Students will have time to ask any questions regarding the course. **Attendance will be taken during our weekly meeting at the beginning of the class.**

COURSE REQUIREMENTS:

This is a hybrid course, and students must be comfortable working independently. Participants should have a solid foundation in computer use, including installing and configuring software and navigating the Internet. Reliable access to a personal computer and a stable Internet connection is essential for the successful completion of the coursework.

Course materials—including content modules, lab exercises, NETLAB, and virtual machines—are accessed through the *Cisco Networking Academy*. To use the web-based content viewer and Linux console (virtual machine), students must have one of the following supported browsers: **Chrome 30+**, **Safari 6.1+**, **Firefox 25+**, or **Microsoft Edge**.

SOFTWARE

- **MS Office tools** will be used in this course. As a MassBay student, you can access **Office 365** and download **MS Office** on your home computer. For more information, visit: <https://portal.office.com/>
- For this class, it is **recommended** to use the free **Adobe Acrobat Reader DC** to read, comment on, and print documents posted online. Make sure you deselect **McAfee** before you download and install the software. Download **Acrobat Reader** here: <http://www.adobe.com/products/acrobat/readstep2.html>
- As a MassBay student, in addition to **MS Office**, you can download and install additional Microsoft products for free (Windows 10, SQL Server, Visio, Visual Studio, etc.). To download software, you should visit [Azure Dev Tools for Teaching](#). You must log in using your regular MassBay username and password (students@massbay.edu). Watch this video: <https://youtu.be/EFyZxYbDywA>
- You must use **Virtual Machines (VM)** on multiple CS courses, including this one. You can create VMs on many operating systems (Windows, MAC OSX, and Linux). Many labs require the creation of VMs running the Windows or LINUX operating system. The CS Department provides a **Google Drive ISO Folder** for multiple operating systems. Here you have the **ISO** folder on Google Drive to create VMs on Windows 10: [ISO Folder on Google Drive](#)

To create a VM, you **MUST** use this "free" software:

- [VMware Workstation Player](#) (if using a **Windows 10** machine)
- [Oracle VirtualBox](#) (if using a **MAC OSX** machine)
- You could use [Boot Camp](#) to make a dual boot (MAC OSX or Windows) on a MAC. For more information on dual booting on a MAC, go to <https://support.apple.com/en-us/HT204990>
- To create/run a VM on a MAC with **M1** or **M2** chips, you can use the free **UTM** (<https://mac.getutm.app/>) application. **VirtualBox V7** now runs on **M1 & M2** chips.

You need to do a full installation for this class and take screenshots as specified in the lab. You are not allowed to use any of the preconfigured images provided by UTM. You need to download the specific ISO file from Google Drive.

COURSE CALENDAR

Week	Ch.	Exams	Subjects	CISCO Labs (1 week) & Cyber Range (2 weeks)	NETLAB (NL) (2 weeks)	Packet Tracer (PT) (1 week)	
W01 Sep 09			- Introductions and Course Overview				
W02 Sep 16	1		- Basic Device Configuration	Lab – 1.1.7 Lab – 1.6.2		PT – 1.6.1	
Sep 22		Professional Day (No Day Classes, EVENING Classes Held)					
W03 Sep 23	2		- Switching Concepts			Intro to IL (Immersive Labs)	
	3		- VLANs		NL Lab – 3.6.2	PT – 3.3.12	PT – 3.4.5
W04 Sep 30	4	E1 (1-4)	- Inter-VLAN Routing		NL Lab – 4.5.2	PT – 4.2.7	PT – 4.3.8
W05 Oct 07	5		- STP Concepts			PT – 5.1.9	
W06 Oct 14	6	E2 (5-6)	- EtherChannel			PT – 6.2.4	PT – 6.4.1
W07 Oct 21	7		- DHCPv4		NL Lab – 7.4.2	PT – 7.2.10	PT – 7.4.1
	8		- SLAAC/DHCP v6 (8.1-8.2)				
W08 Oct 28	8		- SLAAC/DHCP v6 (8.3-8.4) (cont.)		NL Lab – 8.5.1 (O)		
	9	E3 (7-9)	- FHRP			PT – 9.3.3	
Nov 02		Winter & Spring 2027 Course Registration Begins					
W09 Nov 04	10		- LAN Security Concepts	CR Lab [TBA]			
W10 Nov 11	11		- Switch Security Configuration		NL Lab – 11.6.2	PT – 11.1.10	PT – 11.6.1
	Veteran's Day (College Closed) (No Meeting, but you must read Ch. 11 and submit the homework assigned, as always)						
W11 Nov 18	12		- WLAN Concepts	Geniuns Lab			
	13	E4 (10-13)	- WLAN Configuration	Lab – 13.1.11		PT – 13.1.10 PT – 13.2.7	PT 13.3.12 (O) PT 13.5.1 (O)
W12 Nov 25	14		- Routing Concepts			PT – 14.3.5	
Nov 26		Thanksgiving Day (College Closed)					
Nov 30		Last Day to Withdraw from Classes					
W13 Dec 02	15		- IP Static Routing		NL Lab – 15.6.2	PT – 15.6.1	
	16	E5 (14-16)	- Troubleshoot Static & Default Routes	Lab – 16.3.2 (O)		PT – 16.3.1	
W14 Dec 09			Practical Exam in Packet Tracer (PT) Wednesday, Dec 09: 10-11 am (CS 243-751) [Room W424]				
Dec 16	Cafeteria 1-2 pm	STEM EXPO Event – Fall 2026: [Virtual: Dec 14-18]					
W15 Dec 16		Final Exam (Modules 1-16) Wednesday, Dec 16: 10-11 am (CS 243-751) [Room W424]					
W16 Dec 23	Final Exams Dec 17-23	No Classes					

(O): Optional (*) Can be done at home!

*** Schedule, assignments, tests, and course content may change during the semester***

- All labs must be completed at home unless the instructions explicitly state otherwise. Labs must be uploaded to the Cisco NetAcad by the due date.
- Optional (O) assignments are not required, but they are strongly recommended to support your learning and success in the course.
- All Packet Tracer (PT) activities must be completed outside of class and submitted through the Cisco NetAcad website. Both the PDF and the PKA file are required for full credit

COURSE REQUIREMENTS, POLICIES, and GRADING STANDARDS

[Table 1] Grades are based on the following:

Skills		
5%	Attendance & Class Participation	Attendance will be taken during our weekly meeting at the beginning of the class.
15%	Labs	
5%	NETLAB	
25%	Packet Tracer (PT)	
5%	Immersive Labs (IL) homework	Videos & Labs/Quizzes
10%	Practical Final in Packet Tracer (PT)	Mandatory In-Person Exam
5% Extra Credit	Final Project: Presented In-Person & Virtual at the STEM Expo	Instructor's Approval: Projects must be proposed & approved by Feb. 15. They must be hands-on and related to IoT (Internet of Things). Approval is granted on a first-come, first-served basis.
Academic		
0%	Module Quizzes	Online & not graded
5%	Module Group Exams	Online. Exam #1 (Ch. 1-4), Exam #2 (Ch. 5-6), Exam #3 (Ch. 7-9), Exam #4 (Ch. 10-13), and Exam #5 (Ch. 14-16)
30%	Final Exam (Modules 1-16)	Mandatory In-Person Exam

*** Percentages are subject to change at any time and for any reason. Changes will be posted on PIAZZA ***

[Table 2] Marking Scheme:

A	4.0	94-100	W	Withdrawal	
A-	3.7	90-93	WC	Withdrawal from College	
B+	3.3	87-89	WR	Administrative Withdrawal	
B	3.0	83-86			
B-	2.7	80-82	I	Incomplete	
C+	2.3	77-79	UC	Unsafe Clinical	
C	2.0	73-76	AU	Audit	
C-	1.7	70-72	S	Satisfactory	
D+	1.3	67-69	U	Unsatisfactory	
D	1.0	63-66	T	Transfer Credit	
D-	0.7	60-62			
F	0.0	Failing			

This course (CS 243) is based on Cisco's *CCNA 7: Switching, Routing, and Wireless Essentials (SRWE)*, and it is the second course in the CCNA v7.02 curriculum. This course focuses on switching technologies and router operations that support small-to-medium business networks. It includes wireless local area networks (WLANs) and security concepts. Students learn key switching and routing concepts. They can perform basic network configuration and troubleshooting, identify and mitigate LAN security threats, and configure and secure a basic WLAN.

Instructional Objectives:

By the end of the course, students will be able to:

▪ Configure advanced functionality in routers and switches.
▪ Perform basic troubleshooting of these components.
▪ Configure VLANs and Inter-VLAN routing, applying security best practices.
▪ Troubleshoot inter-VLAN routing on Layer 3 devices.
▪ Configure redundancy on a switched network using STP and EtherChannel.
▪ Troubleshoot EtherChannel on switched networks.
▪ Explain how to support available and reliable networks using dynamic addressing and first-hop redundancy protocols.
▪ Configure dynamic address allocation in IPv6 networks.
▪ Configure WLANs using WLC and L2 security best practices.
▪ Configure switch security to mitigate LAN attacks.
▪ Configure IPv4 and IPv6 static routing on routers.
▪ Troubleshoot and resolve common protocol issues in both IPv4 and IPv6 networks.

- **Teaching Procedures:** This hybrid class involves a **short lecture** (if necessary) and a **hands-on lab** to be done at home. Students should read and master the topics in each chapter and be prepared to discuss them if they have questions. This class covers a lot of material in a very short time. Keeping up with the course requires a substantial commitment of your time and effort. Remember that this is a hybrid class, and you are supposed to read the chapter(s) assigned on your own. The instructor will help you with topics you do not understand using PIAZZA.
 - Students are expected to read the **Online lessons (1 or 2 chapters per week)** before class time for each chapter (module) assigned.
 - All homework **must** be submitted by the **due date** on the **CISCO NetAcademy** (not on BB).
 - All **due dates** will be posted on the **CISCO NetAcademy** at the beginning of the semester and will not be moved or changed (unless specified by the instructor).
Due dates are NOT a recommendation and will be enforced (see below).
 - Students must pass both the **skills-based** and **academic** portions of the curriculum to **pass the course**.
- **Labs:** Lab exercises will be provided weekly and must be completed successfully. Students are encouraged to talk with each other or the instructor to maximize the amount of learning that occurs. However, every student is expected to answer the lab questions. All work for this class **must be submitted individually** (see video: **How to Submit a Lab for CS 243**).
 - All labs **must be submitted by the due date**, before the following **Friday at midnight [1 week]** (Check **Cisco NetAcademy** for due dates).
 - When the lab exercise is finished, the instructor will check that the appropriate learning has been achieved; the student will be counted as present and may leave (face-to-face class).
 - In addition to the labs provided in the course, we will have additional labs on **virtualization**, **MassBay Cyber Range**, **virtual machines**, **VMware**, and **Cisco's Packet Tracer**.
- **Packet Tracer (PT):** PT lab exercises will be provided for every chapter (1 or 2 PT) and will be required to be **completed successfully**. Students are **encouraged to talk** with other students or the instructor to maximize the amount of learning that occurs. However, every student is supposed to answer the questions on the PT activities **on their own**. All PTs **must be submitted individually**.
 - All PT labs **must be submitted by the due date** before the following **Friday at midnight [1 week]** (Check **Cisco NetAcademy** for due dates).

How to submit your Packet Traces (PT) on the Cisco NetAcademy (CS 243)

On the Cisco NetAcademy, for each PT, you **must always** submit **2 (two)** files:

(See video: *How to Submit a Packet Tracer for CS 243*):

- 1) submit the **ORIGINAL PDF** file with the answers to questions, **and**
- 2) the **PKA** file, once it is completely configured.
 - **Never** submit a PDF or PKA under the **"Comments"** section.
 - **Always** submit **two (2)** files: **PDF & PKA**.
 - All questions must be answered, even if it says **"Optional"**.
 - **ONLY "Challenge Questions"** are optional.

➤ **MassBay NETLAB Environment:**

NETLAB is used at Cisco NetAcademy worldwide to provide remote access to networking equipment and remote PCs. NETLAB includes supported content specifically designed for Cisco NetAcademy to host Cisco training equipment on the Internet for blended distance learning, remote Academy access, instructor-led training, and student team or individual student equipment access.

The Computer Science department has a NETLAB system that provides virtual access (both remotely and on MassBay computers) to a lab environment for IT, computer networking, and cybersecurity courses, as well as Cisco NetAcademy labs. Your instructor will post on **PIAZZA** when the **NETLAB accounts** are created and available for use.

Several **NETLAB** exercises will be provided during the semester, and they must be **completed successfully**. **Students** are **encouraged** to **talk** with other students or the instructor to maximize the amount of learning that occurs. However, every student is expected to answer the questions on NETLABS independently. All work for this class **must be submitted individually**.

- All **NETLABs** must be **submitted by the due date** before the following **Friday at midnight [2 weeks]** (Check **Cisco NetAcademy** for due dates)

How to use NETLAB (CS 243)

To use **NETLAB**, follow these steps:

- 1) Install or update your web browser to the latest version. The recommended browsers are **Chrome** or **Firefox** on any platform: **Windows** (please don't use **IE**), **Linux**, or **Mac OSX** (please don't use **Safari**)
- 2) Open your browser and connect to our **NETLAB** Server using this URL:
<https://netlab.massbay.edu/>
- 3) Your username and password are:
Username: <same_username_you_use_to_login_to_MassBay>
(Without the @massbay.edu)
Password: **massbay123**
(It will ask you to change it the first time you log in)
- 4) Make a reservation to do a lab as explained in class.

How to submit NETLABS on Cisco NetAcademy (CS 243)

On the **Cisco NetAcademy**, for **NETLABs**, you **must** submit **2 (two)** files:

- 1) Screenshots (MS Word or PDF format) of the **full screen** as explained during class (see submission section on Cisco), **and**
- 2) The **ORIGINAL PDF** file with the answers to the questions (if there are no questions, you **still must submit** the original PDF file, and you can add a comment saying "**no questions**"). Otherwise, the **NETLAB will not be accepted**, and you will get a **zero**.
(See video: How to Submit a NETLAB for CS 243)

➤ **[TBA] CR Labs:**

A **Cyber Range (CR)** is a system used for training that simulates a wide range of security incidents so that cybersecurity professionals and students can practice and learn how to respond effectively in a safe and controlled environment. MassBay's **CCE (Center for Cybersecurity Education)** created a homegrown **CR** as part of an NSF/ATE grant in 2021-2024, where students (MassBay, other CC, and HS) can learn and practice their cybersecurity skills in a virtual/physical and safe environment.

In this class, you will be working on several **CR** lab exercises that will be required to be **completed successfully**. Students are **encouraged to talk** with each other or the instructor to maximize the amount of learning that occurs. However, every student is supposed to answer the questions in labs **on their own**. All work for this class **must be submitted individually**.

- All CR labs must be submitted by the due date before the following **Friday at midnight [2 weeks]** (Check **Cisco NetAcademy** for due dates).
- In these **CR** labs, you will be recording your operations using a tool called *asciinema* (<https://asciinema.org>). *Asciinema* is a free and open-source solution for recording terminal sessions and sharing them on the web. Once your session is finished, you must submit your **.cast** file as part of your homework.

➤ **Immersive Labs (IL) Homework:**

As mentioned before, a **Cyber Range** platform is a collection of hardware and/or software that simulates an organization's network, systems, and even traffic and services, in a safe and controlled virtual environment for cybersecurity, computer networking, and IT training or technology development. In 2022, we worked on a state grant, and as part of the grant, we got access to a commercial *cyber range* called **Immersive Labs (IL)**.

You will have access to **IL** in a few weeks using your MassBay e-mail. You will receive more information on PIAZZA. Use this URL to access your IL account:

<https://massbay.us.immersivelabs.com/signin>

Once you log in to **IL**, you will have access to the following course:

- This assignment will consume a total of **7 hours** of your time during the semester, and you should try to do them in order.
- **Your grade for this assignment will be based on the amount of work you do.** (Check **Cisco NetAcademy** for due dates).

➤ **Module Quizzes and Module Group Exams:**

- I. All **Module Quizzes** will be **taken online** and **will not be counted for your final grade**. They are practice quizzes.
- II. All **Module Group Exams** will be **taken online** the **week when the chapters** are covered, unless specified by your instructor. (See **due dates** on **Cisco NetAcademy-one (1) module group exam every few weeks, 60 minutes**).
 - When you are ready to take a **Module Group Exam**, you must do it in one sitting. Once you start an exam, you must **finish** and **submit it**.
 - **Re-Takes**: There will be **no re-takes** for **module group exams**.
 - Students who do not take **module group exams** during the specified dates will automatically get a **zero (0)**.

➤ **Final Exam (Modules 1-16) & Practical Final in Packet Tracer (PT)**

- The **Final Exam (Modules 1-16)** and **Practical Final in PT** will be **taken in-person** at the **times/dates** specified on the syllabus (see schedule above).
- The day of the exam(s) (**Final Exam** and **Practical Final in PT**), you will open the **CISCO NetAcad** and follow the instructions provided by the instructor. **Otherwise, you will get a zero (0)**.
- **Be on time. The Final Exam (Modules 1-16) and Practical Final in PT will START exactly at 10 am, and it will end at 11 am!**
 - **The exams will be closed at 10:15 am. Any student arriving after that time will not be allowed to take the exam and will get a zero automatically.**
- **Re-Takes**: There will be **no re-takes** for the **Final Exam** or **Practical Final in PT**.

➤ **(EXTRA CREDIT) Final Project:**

Instructor's Approval: Projects must be proposed & approved by the date specified in the syllabus. They must be hands-on and related to **IoT (Internet of Things)**. Approval is granted on a **first-come, first-served** basis.

More information regarding project requirements will be posted on **PIAZZA** during the semester.

IMPORTANT: ~~The project must be completed and presented at the Virtual STEM Expo to receive a grade. Any student who works on the final project but does not participate in the Virtual STEM Expo will get a zero (0) on the project.~~

➤ **Attendance Policy:**

Students are expected to attend every hybrid class (see section “**CLASS PARTICIPATION / ATTENDANCE**”) and are responsible for all material covered during class. Attendance will be taken during each session and lab period. An attendance grade will be assigned at the end of the semester. It is the student's responsibility to see that they are counted as present. Consistent tardiness will count as an absence.

The school attendance policy can be found in the MassBay student handbook
<https://www.massbay.edu/handbook>.

➤ **Late work policy:**

You have **one (1) week** to submit your homework (labs & NETLABs) (see due dates on **Cisco NetAcad**). After the **due date** has passed, you will get **zero** automatically. There will be “**no late assignments**” accepted for any reason.

➤ **Cheating:**

Students are expected to uphold a standard of conduct relating to academic honesty. Students assume full responsibility for the content and integrity of the academic work they submit. **Cheating will not be tolerated**. You are expected to do your work on the assignments and the exams. If you turn in another person's work as your own or if you cheat in any way, you **will receive an “F” for the course**.

The academic integrity and plagiarism policies can be found in the student handbook
<https://www.massbay.edu/handbook>.

➤ **Withdrawal:**

Withdrawal from this course follows the specific dates given in the class schedule.

Getting Technical Assistance

Support for MassBay Systems

- Campus Logon / Password
- Blackboard Learn
- Bay Navigator
- Email

[MassBay Community College Help Desk](#) or

Email: helpdesk@massbay.edu or

Call 781-239-2440 (24/7/365) or

Visit room 242F (rear of main lab) on the Wellesley Hills Campus or

Visit room 305 (library/lab) on the Framingham Campus

The Office of Online Learning

is available to assist students with information and best practices for taking their online and hybrid courses!

Topics include:

- What to expect in an online course
- Common technologies used
- Time management and where to go for additional help.

Email: MassbayOnline@massbay.edu

Accessibility Resources Center

MassBay provides equal access for each student who self-discloses a disability and requests accommodations for learning, testing, or areas of need. Students can make an appointment with an Accessibility Specialist, provide appropriate documentation of the disability, and request academic accommodations. Accessibility Specialists collaborate with faculty, guide students in practicing self-advocacy, apply learning strategies for academic success, advise during course enrollment, and find mentoring and support opportunities.

To meet with an Accessibility Specialist to discuss your learning needs, please call or stop by to make an appointment. Students who need academic accommodations for a course are encouraged to meet with an Accessibility Specialist as soon as possible to complete the necessary Learning and Testing Accommodation Form required by the college for all academic accommodations.

All services are available remotely by phone, email, or video conference.

Wellesley Hills: 781-239-2234 Framingham: 508-270-4267

Campus Resources – see Appendix A for detailed information on campus resources and policies.

Syllabus Appendix A – Additional Campus Resources

Student Well Being

MassBay faculty and staff believe it is important to support the physical and emotional well-being of our students. Any student who has difficulty affording groceries or accessing sufficient food to eat every day, or who lacks a safe and stable place to live, and recognizes that it is affecting their performance in the course, is urged to contact the Student Development Office at 782-239-2753 or studentdevelopment@massbay.edu for resources and support. For all available resources, see: <https://www.massbay.edu/studeve>.

Success Coaching

If you are concerned about remote classes, how to stay organized and stay up to date with assignments, or how to manage the new stressors of the changing learning/working environment. Please email: coaching@massbay.edu or call 781-239-2727.

Library Resources

MassBay has a library collection of more than 30,000 volumes and a host of electronic resources, including e-books, streaming videos and bibliographic databases. The College is a member of the Higher Education Libraries of Massachusetts (HELM) that provides access to the collections of 7 college libraries across the state. Interlibrary loan and delivery services are available to students and faculty. Librarians are located on both campuses to assist students with research, using the catalog, and accessing online databases.

Academic Achievement Center (AAC)

The Academic Achievement Center (AAC) employs professional learning specialists and peer tutors across subjects. They help students with reading and study skills, writing for any class, and all levels of math and science. The AAC welcomes both walk-ins and appointments and is open Monday-Friday on both campuses. Online tutoring is also available. The AAC is located in Framingham on the third floor, inside the Library, and in Wellesley Hills on the second floor, next to the Library. For more information or to make an appointment, visit www.massbay.edu/aac. Email aac@massbay.edu. or call 508-270-4213 (Framingham) or 781-239-2632 (Wellesley Hills). All services are free.

Testing Services

The AAC offers make-up exam services to students who have a legitimate reason for taking their exam outside of class. All exams must be dropped off and picked up by the professor. Exams are by appointment only, and it is the student's responsibility to make an appointment. Students will need a picture ID to take the exam in the AAC. Please call the AAC directly for more information: Framingham: 508-270-4213, Wellesley Hills: 781-239-2632.

Counseling Services

Taking care of oneself amidst the pressures of school, family, work, and relationships can often be part of the challenge of being a college student. Learning how to better adapt and cope with these stressors can improve the quality of your life and enhance your success at MassBay. Counseling is the process during which you work with a professionally trained, licensed counselor to become a healthier human being in all aspects of life: Emotional, Intellectual, Physical, and Spiritual.

When you make your first appointment, you will simply be asked to provide us with your contact information and best way to reach you. There is no need to disclose why you want to see a counselor when you make an appointment.

Counseling Services at the Office of Student Development:

Wellesley Campus, Room 130 - Call 781-239-3142

Framingham Campus, Room 100 - Call 781-239-3142

The Advising Center

The Advising Center is committed to assisting students in the development of meaningful academic plans that are compatible with their professional and life goals. Services provided by the Advising Center include:

- Assistance with course registration, adding and dropping classes and course withdrawals
- Transfer Credit Evaluation
- Information on Challenge Exams
- Information on Competency Exams {AP, CLEP, UExcel, DANTES}
- Change of Advisor
- Change of Major
- MassTransfer and Transfer Counseling
- Permission to take courses at other institutions
- Graduation Reviews
- Referrals to other campus resources

All registered students are assigned an academic advisor. The name and contact information for one's advisor are available on the Student Center page of Bay Navigator. Advisor assignments are generally made during the fourth week of the fall and spring semesters.

Our locations are room 113 in Wellesley Hills and the first floor Enrollment Center in Framingham.
